

## Color Looks - Installation

In Photoshop all color looks can be used by loading them into the Color Lookup adjustment's "Browse" menu. In Premiere Pro simply use the Lumetri Color Panel's Look menu to Browse to the looks. All of the Art Series Color Looks are provided in .3DL format for both Photoshop and Premiere Pro.

Below are instructions to add the color looks to the Lumetri (Premiere Pro) or Color Lookup adjustment (Photoshop) list of looks.

### **FIRST:**

- 1) Close your Adobe applications first (Photoshop and/or Premiere Pro).**
- 2) Make sure you have the Creative Cloud Desktop App installed and launched, and that File Syncing is turned on (from the Creative Cloud Desktop App preferences).**
- 3) Upon purchase, the .ZIP file will download to your Downloads folder. NOTE: The Creative Cloud desktop app may display a pop-up that states you have installed the add-on, but that only means you have downloaded the .ZIP file to your Downloads folder. See next...**

===

### **Photoshop**

Make sure Photoshop is not running during the install, or quit and relaunch Photoshop after the following:

Mac:

- 1) Go to the destination of your download (e.g. your Downloads folder), and double click the downloaded .ZIP file. Then open the uncompressed folder and use Cmd+A, or Cmd+Shift, to select all (highlight all the files).  
Then go Edit>Copy, or Cmd+C
- 3) Navigate to [hard drive] > Applications > Adobe Photoshop [your version] > Presets > 3DLUTs
- 4) Highlight the 3DLUTs folder and choose Edit>Paste, or Cmd+V.

Windows:

- 1) Go to the destination of your download (e.g. your Downloads folder), right-click on the the Zip file, and choose Extract All. Then open the uncompressed folder and use Ctrl+A, or Ctrl+Shift, to select all (highlight all the files).
- 2) Then right-click and choose Copy, or press Ctrl+C
- 3) Navigate to Computer > C Drive > Program Files > Adobe > Adobe Photoshop [your version] > Presets > 3DLUTs
- 4) Right-Click on the 3DLUTs folder and choose Paste

To apply the Color Looks in Photoshop, add a Color Lookup adjustment layer, and choose Load 3D LUT. Browse to the Color Looks and choose one of the .CUBE files to apply the look to your document.

## **Premiere Pro**

### Mac

- 1) Go to the destination of your download (e.g. your Downloads folder), double click on the downloaded folder.
- 2) In the Premiere Pro's Effects panel choose Video Effects > Color Correction > Lumetri Color, and drag Lumetri Color to your clip in the Timeline.
- 3) In the resulting dialog navigate to the extracted folder and choose one of the .CUBE Files.
- 4) In Premiere Pro CC 2015 or later, choose Workspace, Color, and in the Lumetri Color panel's Look Menu (in the Creative section) choose Browse. Navigate to the extracted folder and choose one of the .CUBE Files.

### Windows

- 1) Go to the destination of your download (e.g. your Downloads folder), right-click on the .zip folder, and choose Extract All.
- 2) In Premiere Pro CC, open the Lumetri panel or choose the menu Windows > Workspace > Color, and in the Lumetri Color panel's Look Menu (in the Creative section) choose Browse. Navigate to the extracted folder and choose one of the .CUBE Files.

IF you wish to have the entire folder available in Premiere Pro's Lumetri panel list, here are steps for the Mac. For Windows, please contact me for the Win version of these steps:

- 1) Unzip the file
  - 2) Navigate to your Applications folder and open the Premiere Pro folder.
  - 3) Right-click on the Premiere Pro application, and choose "Show Package Contents", and open the "Contents" folder
  - 4) Open the Lumetri folder, and then the LUTs folder
  - 5) Copy the folder of .CUBE files into the "Creative" folder, inside the LUTs folder.
- You can just put the folder in there, you don't need to drag out all the individual files.

Re-launch Premiere Pro, and the color looks will show up in the Lumetri panel list.
