

Ses2Sesx Update Log

- Version 1.0.0.0 13/4/11
Initial release
- Version 1.0.0.1 15/4/11
Fixed CEP 2.0 & CEP 2.1 clip indent values
- Version 1.0.0.2 19/4/11
Fixed SESX Track Automation now no longer turned on by default
- Version 1.0.0.3 23/4/11
Fixed CEP 1.2 clip volume showing infinity
- Version 1.0.0.4 24/4/11
Fixed CEP 1.2 clip envelopes which included clip indent value
- Version 1.0.0.5 25/4/11
AA2 & AA3 (& AA4) can have Track Mute that is not just zero or one but 0 to 0.5 or 0.5 to 1
This is now detected and mute on/off is now correctly displayed in these cases
- Version 1.0.0.6 26/4/11
Added Track Bus routing for CEP 1.2
- Version 1.0.0.7 26/4/11
Fixed master track volume defaulting to +1db rather than 0db
- Version 1.0.0.8 26/4/11
Fixed AA1.5 track routing – only an issue with busses present
- Version 1.0.0.9 27/4/11
Fixed bug introduced in master track volume in v1.0.0.7
- Version 1.1.0.0 28/4/11
Improved memory handling
- Version 1.1.0.1 30/4/11
Added minimal support for loops – this feature is largely unsupported in AA5.5
Fixed errors with track & file names containing an ampersand (&)
- Version 1.1.0.2 01/5/11
Fixed error with clip pan envelope not offset by clip indent
- Version 1.1.0.3 10/5/11
Changes to marker comments to remove null characters should they exist
- Version 1.2.0.0 22/5/11
Master track now processed for fx, automation lanes etc
Relative paths added
Some filtering of non-english characters
Now caters for '+6db clip envelope' option
- Version 1.2.0.1 28/5/11
Fixed error with track pan knob
- Version 1.2.0.2 01/6/11
Fixed error with CEP with clips with clip pan
Added support for CEP 2.1 fx
Now write conversion details (ses2sesx version and ses version) as a comment into sesx file
- Version 1.2.0.3 24/6/11
Fixed sections of sesx written in non-english (clip envelopes/keyframes)
Fixed Low & High Shelf Cutoff values in Parametric EQ
- Version 1.2.0.4 25/6/11
Fixed AA1.5 FX on a Bus – some were not showing or parameters incorrect
- Version 1.2.0.5 20/7/11
Fixed CEP 2.00 session files not appearing in list
- Version 1.2.0.6 09/9/11
Added option to remove non-english characters which may cause the sesx to not load
- Version 1.2.0.7 11/9/11
Option to remove non-english characters now includes the session name which caused the sesx to not load
- Version 1.2.0.8 23/9/11
'Cool Edit Pro 2.1D' ses files not showing in main screen – now fixed
- Version 1.2.0.9 07/10/11
"&" in filenames causes sesx not to load– now fixed
- Version 1.2.0.10 07/11/11
Improved 'remove non-english characters' option for Chinese dialect
- Version 1.2.0.11 26/11/11
Added support for Simple Chinese, Traditional Chinese, Korean, Western, Central European, Greek, Japanese 1, Japanese 2, Vietnamese & Thai dialects
- Version 1.2.0.12 15/1/12
Fixed low cut off frequency less than 20hz in Parametric Equalizer (min 20hz in CS5.5)
Added support for Russian & Cyrillic and added an option to NOT write pathnames to the sesx file.
Handy if running English versions but with a non-English OS
- Version 1.2.0.13 25/02/12
Fixed multiple '&'s in file names
- Version 1.3.0.0 22/02/12

Removed the need to donate in order to access full conversion functionality

Version 1.3.0.1 09/03/12
Added Cool Edit 2000 1.0 to the list of supported formats

Fixed crash caused by some drive configurations

Version 1.4.0.3 18/09/12
Fixed overflow errors caused by CEP 1.2a sessions

Version 1.4.0.4 14/10/12
Fixed error converting Audition 2.0 ses files containing midi tracks

Version 1.4.0.5 19/10/12
Removed references to midi files in Audition 2.0 sessions

Version 1.4.0.6 21/11/12
Added basic clip stretch support for AA1.5, AA2 & AA3 sessions

Version 1.4.0.7 06/12/12
Added basic clip loop support for AA1.5, AA2 & AA3 sessions

Version 1.4.0.8 12/12/12
Fixed error caused by an "&" in the ses filename

Version 1.4.0.9 07/01/13
Fixed an error reading the 'Delay' FX which caused the program to crash

Version 1.4.0.10 09/01/13
Fixed an error where clip volume envelopes may be set to zero resulting in no volume

Version 1.5.0.0 08/02/13
Fixed an error where non-english language conversions could use a language other than the one selected

Version 1.5.0.1 28/05/13
Added support for German versions of the graphic equalizer, Full Reverb and Parametric Equalizer

Version 1.5.0.2 09/08/13
Fixed error with prefade/postfade fx setting

Version 1.6.0.0 14/03/14
Fixed error with stretched clips

Version 1.6.0.1 29/06/14
Now strip chr\$(1) & chr\$(2) from marker comments from corrupted ses files

Version 1.6.0.2 25/09/14
Now strip chr\$(3) to chr\$(9) from marker comments from corrupted ses files

Version 1.6.0.3 11/10/14
Fixes the presence of a single quote in either a folder or filename referenced in the sesx which would cause the sesx not to load

Version 1.6.0.4 01/06/15
Maintenance release

Version 1.6.0.5 23/08/15
Added support for Cool Edit 2000 1.1 session files

Version 1.6.0.6 23/08/15
Fixed issues with incorrect clip envelope keyframes in Cool Edit 2000 1.1 session files

Version 1.6.0.7 13/03/17
Fixed issues with Cool Edit 1.2 session files

Version 1.6.0.8 14/03/17
Fixed further issues with Cool Edit 1.2 session files

Version 1.6.0.9 15/03/17
Fixed issue with Audition v3 session file causing crash

Version 1.7.0.0 13/05/17
Fixed issue with empty tracks

Version 1.8.0.0 31/12/17
Fixed issue with duplicate track numbers with some Audition 1.5 session files

Version 1.8.0.1 31/01/18
Fixed issue with no sound when converted sessions opened in Audition 2018

Version 1.8.0.2 05/09/18
Attempt to internationalise number formats

Version 1.8.0.3 24/09/19
Added support for Cool Edit Pro 1.1 session files
