

## How To Use Wet Plate Effect For Adobe Photoshop

**WATCH THE DEMO VIDEO**

1. Open "Wet Plate Template" PSD file in Photoshop.
2. Double-click to open layer "INSERT PHOTO".
3. Place the photo, rasterize and close it with save.
4. Edit 'Blur Gallery' layer effect (place the center of the spin blur on the nose).
5. Adjust Iris Blur
6. Select one of the BW effects in the layer group.
7. Select one of the adjustment layers in the "Contrast Effect" group.
8. Select one of the texture layers in the "Dark Textures" group.
9. Also, select one of the texture layers in the "Light Textures" group.
10. If necessary, add a bit of film noise from the "Film Grain Effect" layer group.
11. Also in the group "Sepia Effect" there are 4 variants of sepia shades.
