

How to install Meijnhout Photography Wedding presets in Adobe Lightroom Classic CC and Adobe Lightroom CC?

Thank you for using the Wedding Presets from Meijnhout Photography. This manual will help you to install the presets in Adobe Lightroom Classic CC and Lightroom CC

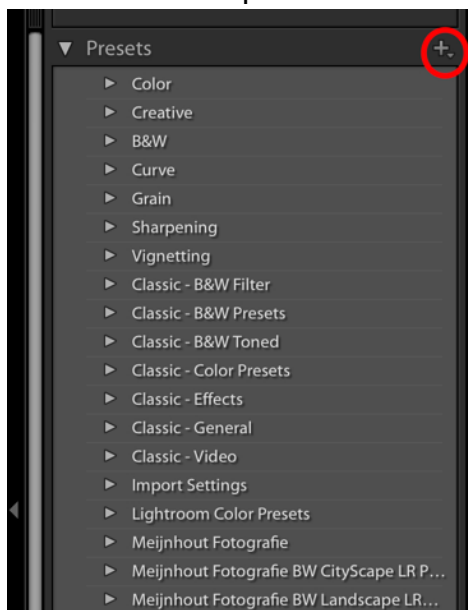

1) Adobe Lightroom Classic CC (v7.3 and higher)

- Open your Download folder on your computer (and unzip the downloaded file if not done already)

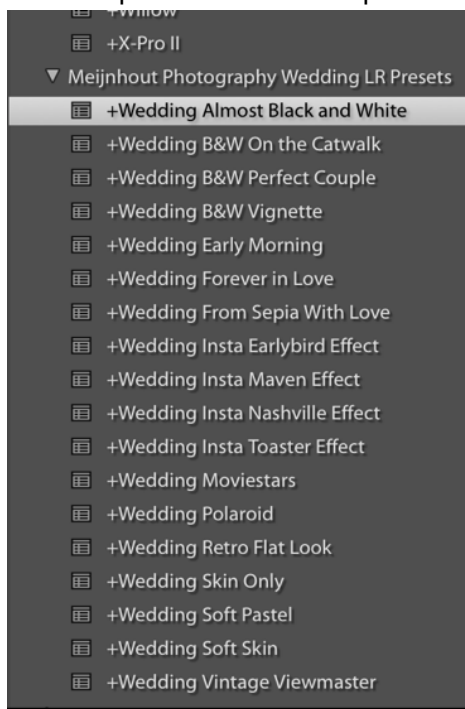

- In the Develop mode click on the '+' button under 'Presets' and select 'Import Preset(s)'

- Browse to your download folder and select the 'Meijnhout Photography Wedding LR Presets.zip' (If you see a folder called 'Meijnhout Photography Wedding LR Presets' open this folder first)
- Select all preset files (CMD+A on a Mac or CTRL+A on Windows) or just select the ZIP file that contains your presets.
- Click on 'Import'

- The presets are all imported and ready to use!!

- Normally no restart is needed. If the presets are not visible after import, please restart Adobe Lightroom

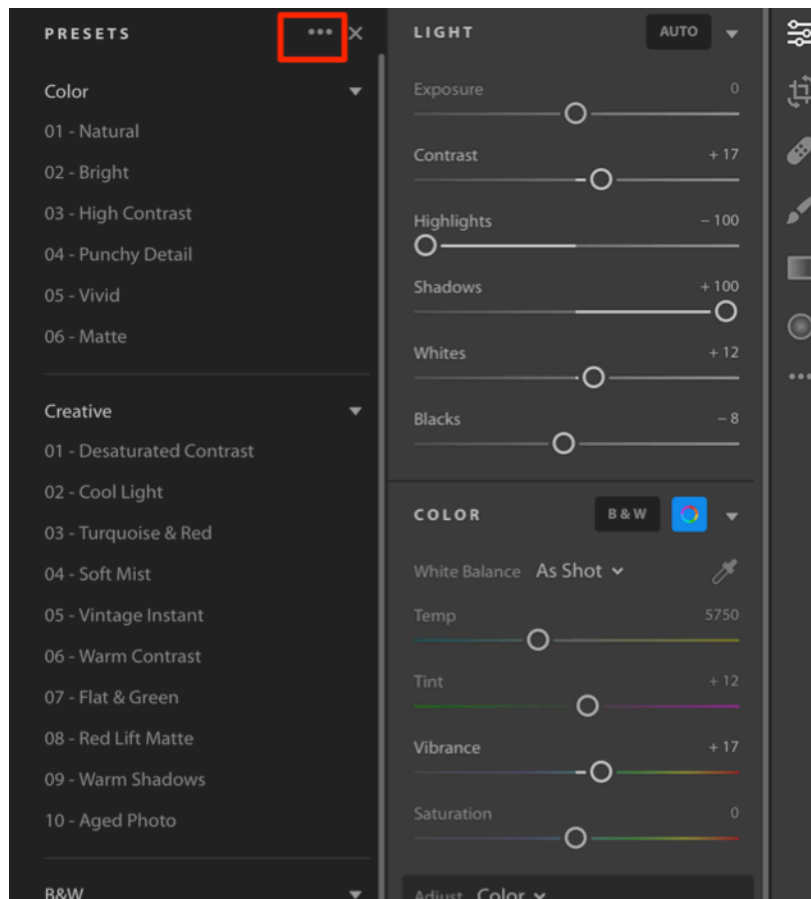

2) Adobe Lightroom CC (v.2.1.1)

→ If you are using Adobe Lightroom Classic and imported the presets already in previous steps, the presets were automatically imported in Adobe Lightroom CC. If this failed for any reason you can do a manual import according to the steps below

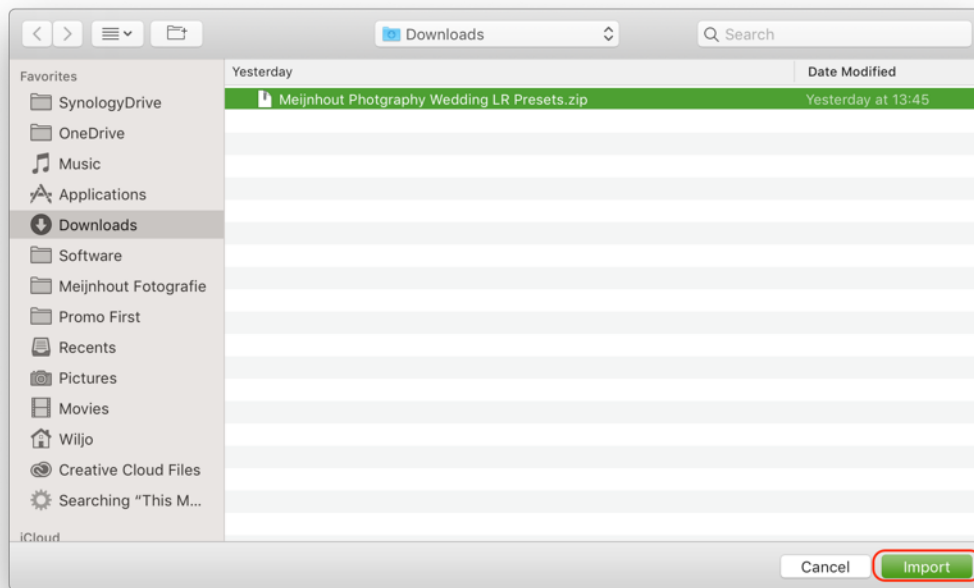

- Open Adobe Lightroom CC
- Click on the slider logo (upper right)
- Click on 'Presets' (lower right)

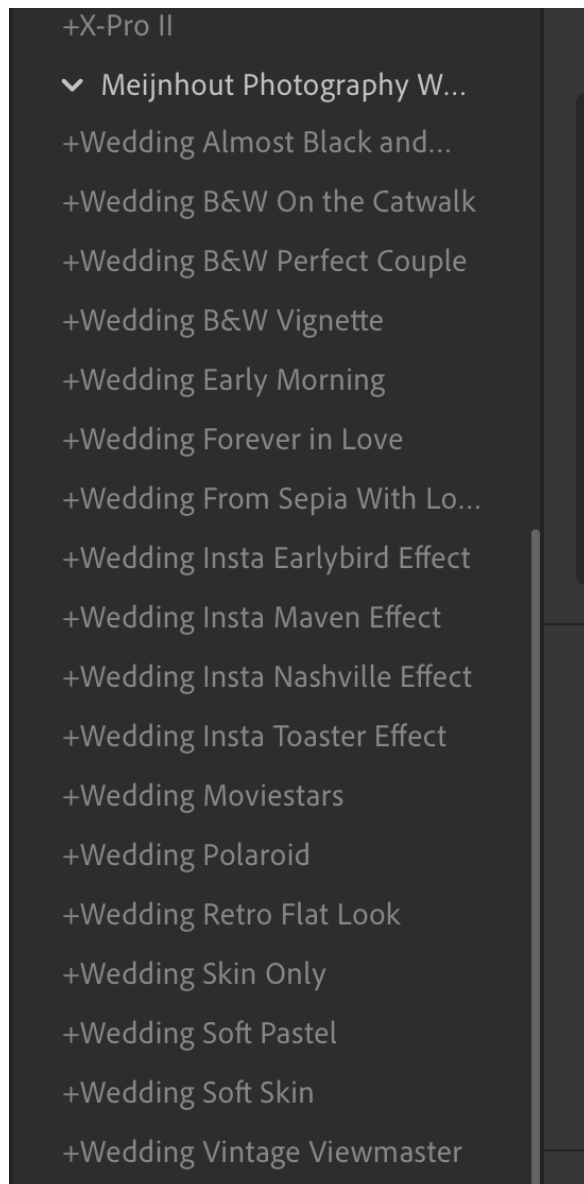

- Click on the 3 dots and click on 'Import Presets'

- Browse to your Download folder on your computer
- Select the ZIP file
- Click on 'Import'

- The presets are all imported and ready to use, no restart of Lightroom CC is needed

Happy Editing!
