

Layer Style Creative Kit

How to use

1. Open Photoshop
 1. Install Layer Styles "Watercolor styles.asl": Window > Styles > Load styles
Or drag-n-drop it to Photoshop. (Do not place into the layout, but into the interface space).
2. Open the PSD template _QUICK START.psd (5000x3335 px 300 dpi)
3. Create a text or any graphics on a new layer.
4. Open the styles window, select one of the styles, and apply it to the layer.
5. To give the edges of the layer some unevenness, use the effect:
Filter > Distort > Ripple
