

Planets And Space Styles For Adobe Photoshop

How to use

1. Open Photoshop
 1. Install ASL file "Planets_And_Space_Styles_For_Adobe_Photoshop.asl":
Window > Styles > Load styles
You can simply drag-n-drop it all into Photoshop (Do not place into the layout, but into the interface space).
2. Open the PSD template _QUICK START.psd (5000x3335px 300 dpi)
3. Create a text or any graphics on a new layer.
4. Open the styles window, select one of the styles, and apply it to the layer.
5. Move the pattern inside the layer.
6. You can complement your design with PNG objects.
