

# Function Overview

## Sides to Extend / Clip

Select all, none or specific ones.

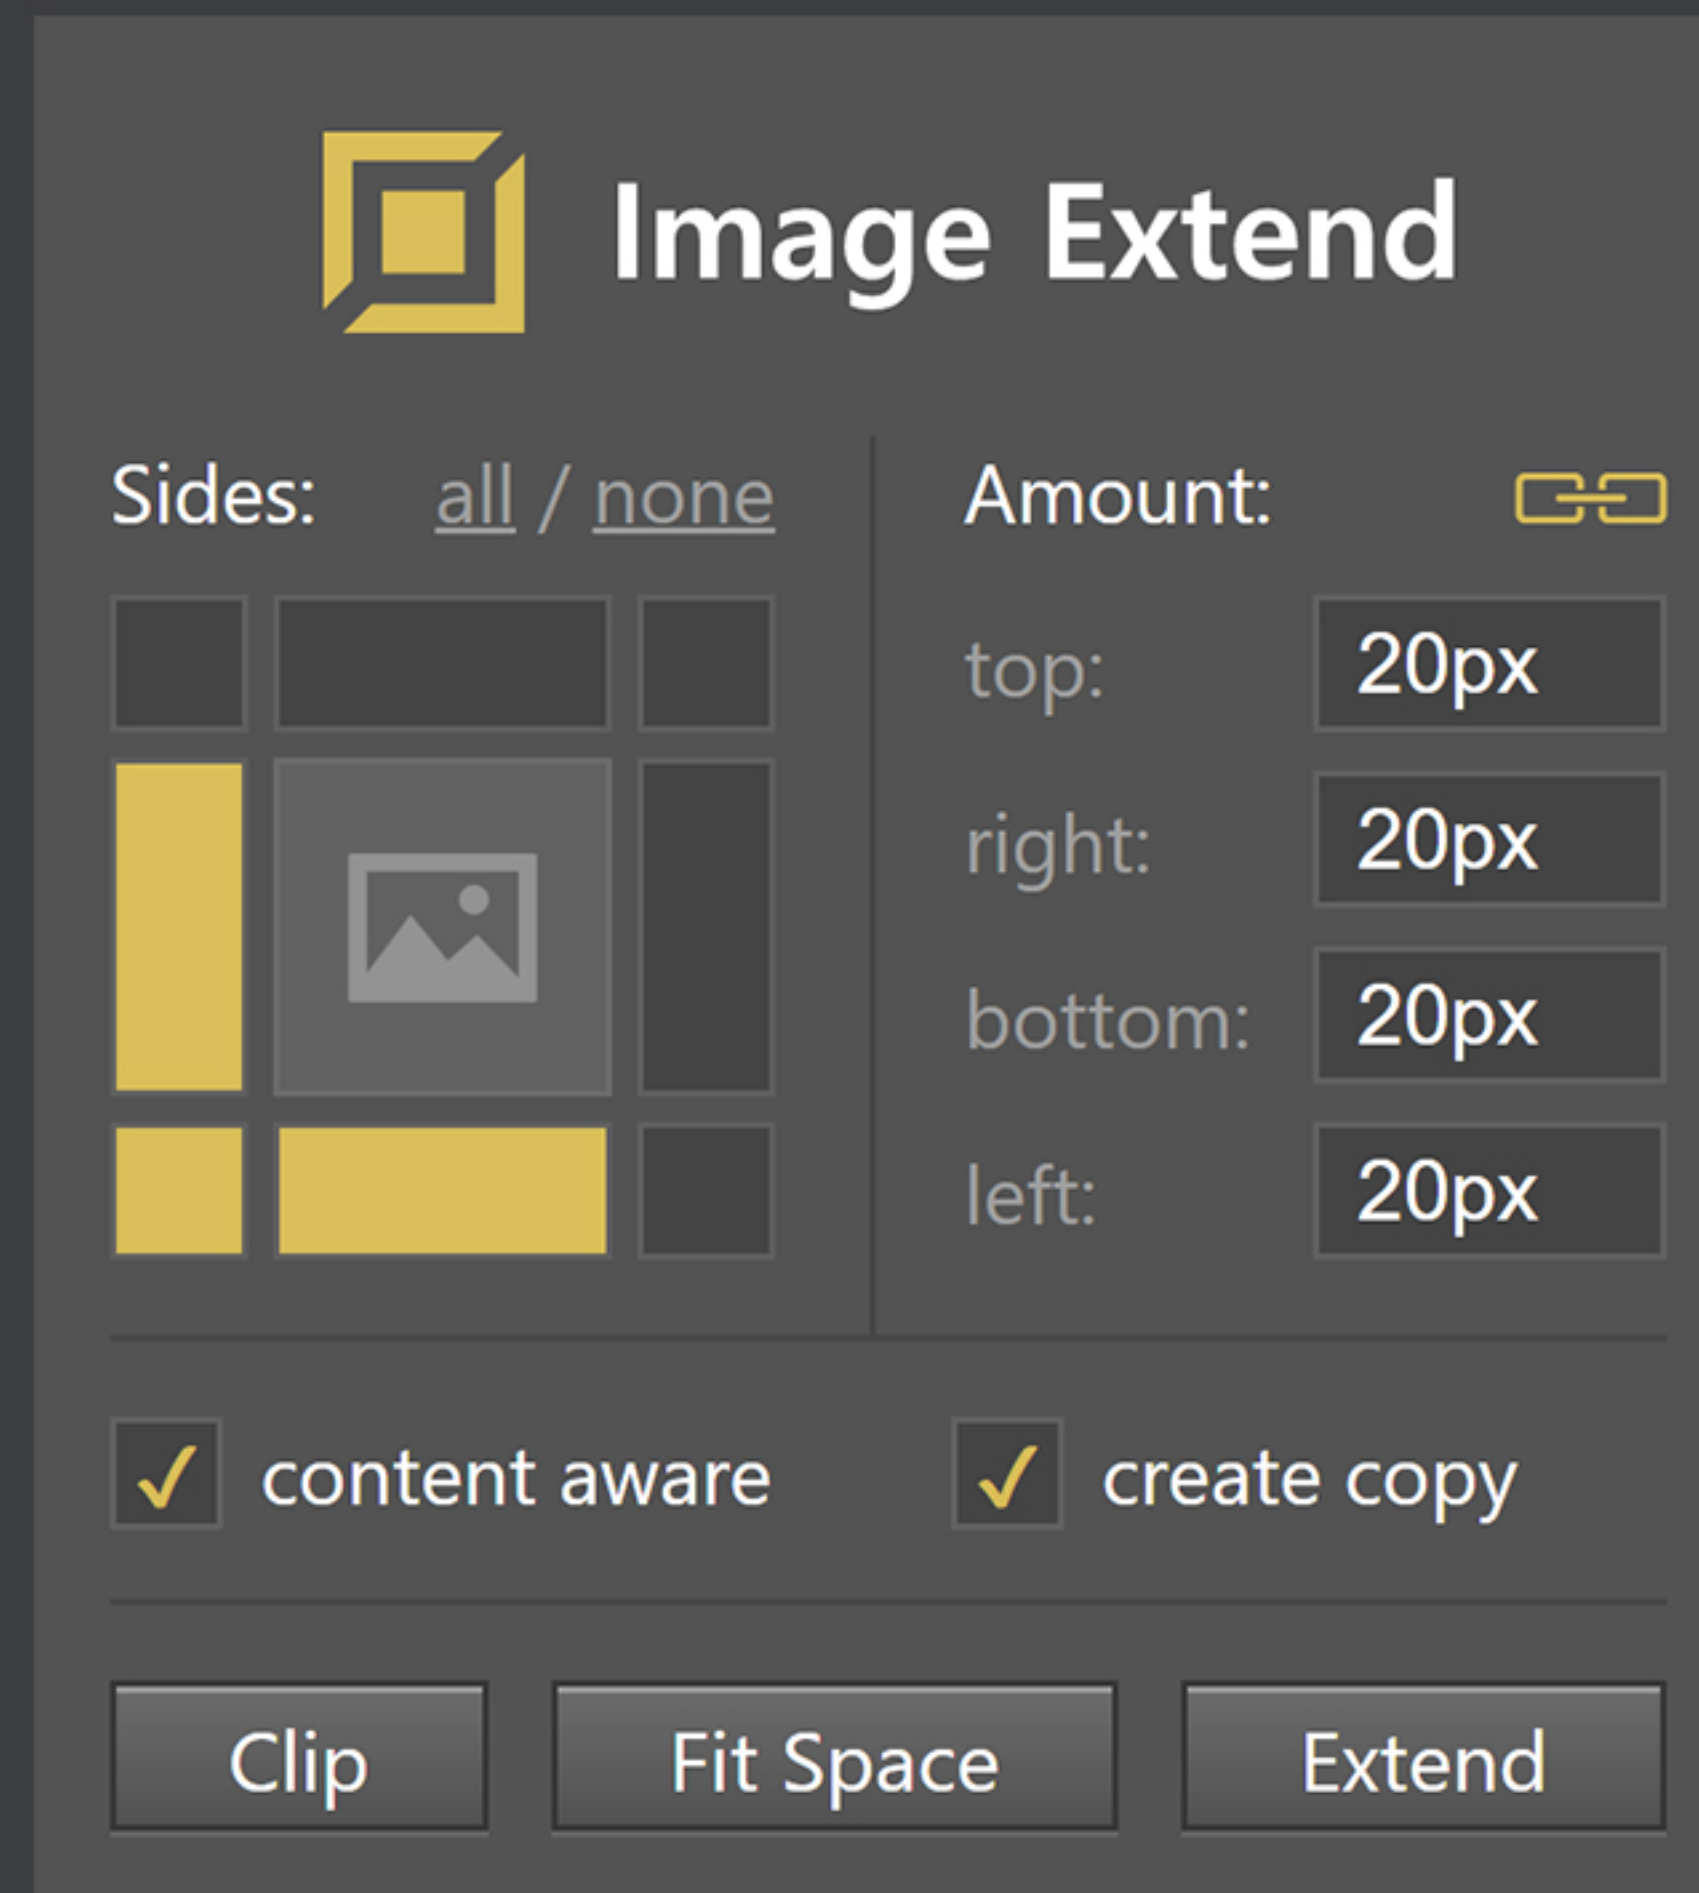

## Content Aware:

On: Extend based on the images contents to create a seamless transition.

Off: Extend based on repeating edge pixels

## Clip Selected Sides

If the layer has a mask, it will be adjusted. Otherwise the pixels will be deleted.

## Amount / Distance:

By default, amounts for each side are synced. Click the chain icon to edit individually.

You can use units like 'px', 'in', '%', ...

## Create copy on/off

Turn it on if you want to keep your original layer unchanged

## Extend Selected Sides

## Fit to Available Space

Extend the selected sides as much as needed to fill the document or selection bounds
