

# Bannersnack PS Plugin

## Version 1.0.0 Beta

### What's new:

- User sign-in with a token (see your [account options](#))
- New feature: Upload individual layers as assets in your Bannersnack library
- New feature: Create a new banner from each selected artboard; if no artboard is present, layers are grouped in one banner
- For each action, you can choose in which workspace you want the assets or banners to be placed in
- When a new version is available, you will be notified in the Photoshop plugin

## Version 1.1.0
