

Examples

Data Source

```
<Data>
  <Record id="1">
    <FirstName>Jane</FirstName>
    <LastName>Doe</LastName>
    <SpecialAccess>1</SpecialAccess>
    <Picture>imgs/001.jpg</Picture>
  </Record>
  <Record id="2">
    <FirstName>John</FirstName>
    <LastName>Smith</LastName>
    <Picture>imgs/002.jpg</Picture>
  </Record>
</Data>
```

Example 1

Output *FirstNameLastName* of the first record

```
#{=Record[1]/FirstName} #{=Record[1]/LastName}
```

Example 2

Output *FirstNameLastName* of all records

```
#{*Record}#{=FirstName} #{=LastName}#{.}
```

Example 3

Output *FirstNameLastName* of all records. Suffix with *(SA)* if user has *SpecialAccess* or *(NA)* if user does not have special access.

```
#{*Record}#{=FirstName} #{=LastName} #{?SpecialAccess=1}(SA){:}(NA){.}#{.}
```

Example 4

Output *FirstNameLastName* of all records but declare the outputting part as a reusable Component.

```
#{*Record}@Comp1}{.}  
#{#Comp1}{=FirstName} #{=LastName}{.}
```

Example 5

Output the picture of the first record to a picture frame named *ProfilePic*

```
{=Record[1]/Picture,ProfilePic}
```
