

TOP ▶ TRANSITIONS

1. Unzip the product ZIP file.
2. Double-click the Setup file.
3. Allow the app to make changes on this device.

4. Click "Next" on the installation screen.
5. Click "Install" on the next screen.
6. Wait for the installation and click "Finish".
7. Restart Adobe Premiere Pro.
8. Open Effects > Video Transitions > TT 'Plugin Name'
9. Just drag-n-drop the selected transition to the timeline between clips.
10. You can choose one of the transitions that is more suitable (for example, the direction of movement of the camera).
