09 - EDITING TEMPLATES IN PREMIERE PRO

10 - SUPPORT

REQUIREMENTS & COMPATIBILITY

INTERNET CONNECTION > WIZZYMOTION IS A CLOUD APPLICATION

(Please make sure that no FireWall or Antivirus is blocking Adobe Applications from accessing the Internet)

OPERATIONAL SYSTEM > WINDOWS OR MAC

ADOBE PREMIERE PRO COMPATIBLE VERSIONS > CC2019 (v13.1.5) / CC2020

ADOBE AFTER EFFECTS COMPATIBLE VERSIONS > CC2018 (v15.1.2) / CC2019 / CC2020

STEP 01 - RUN WIZZYMOTION

A > OPEN PREMIERE PRO OR AFTER EFFECTS

B > RUN WIZZYMOTION EXTENSION

In the top menu of Premiere Pro / After Effects go to: WINDOW / EXTENSIONS.
In the side sub-menu click > **WizzyMotion** (image below).

STEP 02 - CREATE YOUR FREE ACCOUNT

Click on "CREATE FREE ACCOUNT" button, fill in the information and you're done!

STEP 03 - CONNECT YOUR ENVATO USER

In order to use **PREMIUM PACKS**, you will need to connect the Envato Account that made the purchase to your WizzyMotion user.

Your browser will open and you will be guided through the connection process. Make sure to login (or already be logged in) to Envato with exactly the same account that made the purchase of the Premium Pack.

Each WizzyMotion account can only connect with one Envato account at a time and vice versa. This process will synchronize Envato and WizzyMotion users.

Please authorize the WizzyMotion APP from the Envato API and your purchases of products compatible with WizzyMotion will be synchronized automatically.

You can trust. Envato will give us access to only the data needed for this check, your privacy is 100% guaranteed.

STEP 04 - UNDERSTANDING THE INTERFACE

A

B

C

D

E

F

A > The Top Window works as a search engine, refinement, ordering and also as a Preview Window. Two functions in one! Smart and compact to optimize your experience.

B > Here is where it all happens! Preview and import the chosen template with a click.

C > Download and install Free and Premium Packs. Super easy!

D > Confused by so many options? You can create a list of your favorite templates and make this task easier. (Especially if your zodiac sign is Libra)

E > Need help? Here you will find what you are looking for.

F > Your Settings are here. See all your available licenses, reset your password, connect and disconnect your Envato account.

STEP 05 - THE SEARCH ENGINE

A > Type in a single word that means what you're looking for and the results will be revealed in no time.

B > By default all Categories are displayed, use this menu to display only the desired Category.

C > Want to further refine? Select the desired subcategory and see only its templates.

D > A unique experience in the way of displaying the templates. Choose to see Featured templates, the trend of the most used by all users or just what is Free or what is Premium. You are in control.

E > A quick menu with access to everything.

STEP 06 - INSTALLING PACKS

Important: Although the installation process is the same, Premiere Pro packs run only in Premiere Pro and After Effects packs run only after After Effects.

By clicking on the Packs Icon (A), the Interface will display all the Packs available to you. (Free & Premium)

The "Download" button (B) will take you to the web page where you can download the pack you want to install.

After downloading the desired pack, extracting the .zip file in your chosen location, click on the "Install .pack" button (C).

Find the file with the **.pack** extension in the location where you saved the downloaded pack and you're done!

If you change the folder location of this file in the future, just click the Re-Install button (C) and select the **.pack** file in the new location.

The screenshot shows the WizzyMotion interface. At the top left is the 'WizzyMotion' logo and a menu icon. Below it are three steps:

- STEP 01**: Download the Pack and extract the contents of the .zip file.
- STEP 02**: Click on Install. If you have not yet connected your Envato account to WizzyMotion, your browser will open and you will need to connect to exactly the same account that made the purchase. After this, Click Install and select the ".pack" file where you extracted the contents.
- STEP 03**: If for any reason you modify the location of the contents of the pack you extracted. Click reinstall.

Below the steps is a section titled 'AVAILABLE PACKS' with a speaker icon. The first pack is 'Create Pack for Premiere' by AlphaFX, featuring '+3600 elements' and 'Responsive: Yes'. It has two buttons: 'Install .pack' (marked with a yellow 'C') and 'Download' (marked with a yellow 'B'). Below this is a 'FREE' pack 'Create Pack PPro - Free Trial'. At the bottom of the interface is a navigation bar with icons for Home, Packs (marked with a yellow 'A'), Favorites, Messages, and Settings.

STEP 07 - IMPORTING TEMPLATES

A > When hovering over a thumbnail, the preview will be displayed in the Top Window, overlaying the search window (which you don't need to see while previewing)

First, create a "Sequence / Composition" or Open the "Sequence / composition" to which you want to import the Template and define the point in time of the timeline where you want the Template to be added, then Click "Apply" and the template will be imported into the timeline and will be responsively adjusted to the same configuration as the active "Sequence / Composition".

Important: When importing a Template into **AFTER EFFECTS**, WizzyMotion will ask you to choose a unique name for the template. This will make it easier to find your composition when you need it and that name will be used in the expressions added. (Please do not change this name in the future or some expressions will stop working)

If you click on the heart icon inside the Thumbnail it will automatically be added to your favorites list.

If the Template belongs to a Premium Pack that you don't already have, you will see the text "Get It!" and you will be taken to the page where you can download it.

A

STEP 08a - EDITING TEMPLATES IN AFTER EFFECTS

In the top menu of AFTER EFFECTS go to: WINDOW / EFFECTS CONTROLS. Make sure that this option (A) is active.

If the Effects Control Panel is active, you will see it in the After Effects interface (B).

First > Select the Layer (Template) you want to customize in your Timeline.

If the template you are trying to customize **DOES NOT CONTAIN TEXTS**, all customization options (C) will be displayed in the "Effect Controls" panel. Just use the available options of scale, colors, etc.

IF THE TEMPLATE CONTAINS TEXTS, PLEASE GO TO STEP 09b >>

B Usually displayed in the upper left side along with the Project Panel.

STEP 08b - EDITING TEMPLATES IN AFTER EFFECTS (TEMPLATES WITH TEXT)

If you have already read STEP 09a, but the chosen template:
CONTAINS EDITABLE TEXTS or **NO OPTION APPEARS** in the "Effect Control" Panel (B).

First > **Double-Click** over the Layer (Template) you want to customize in your Timeline.

Your Pre-Comp will open and the layers that can be modified will be displayed.
Select the **"CONTROL"** Layer and all customization options will appear in the Effect Control Panel (B).

B Usually displayed in the upper left side along with the Project Panel.

IMPORTANT: To avoid calculation errors in Expressions, use only the Scale Sliders (C) of the Effect Control Panel (Never change the font size in Characters Panel).

STEP 08c - EDITING TEMPLATES IN AFTER EFFECTS (MODIFYING TEXT LAYERS)

First > **Double-Click** the "TITLE" LAYER you want to customize in your Timeline.

When double-clicking, all the text on this layer will be selected.
Just **TYPE** the desired text and it will be replaced.

In most cases, you can modify the font and text properties using the Character Panel (A).
However, the controllers in the "CONTROL LAYER" (B) are Master Controls.

The controllers displayed in the "CONTROL LAYER" are able to completely customize your template.
We suggest that you **use the "Character Panel" only to modify the Font**.
Any manual changes to the Character Panel can generate expression errors,
modify (at your own risk) only if you have advanced knowledge of After Effects (including expressions).

A Use only to change fonts.

B Use the "CONTROL LAYER" Controllers to customize the Text Properties.

STEP 09 - EDITING TEMPLATES IN PREMIERE PRO

In the top menu of Premiere Pro go to: WINDOW / ESSENTIAL GRAPHICS. Make sure that this option (A) is active.

If the Essential Graphics Panel is active, you will see it in the Premiere Pro interface (B).

First > Select the Template you want to customize in your Timeline.

Click on the "Edit" tab (C) and the customization options will be displayed.

Customize (D) texts and fonts when options are available.

Customize (E) the colors of your project.

In the Design (F) option you can modify scale, borders, extra-size and other settings related to the design of the selected template.

* If the option is closed, just click on it and the available options will be displayed.

NEED HELP?

Visit our Help Center, you will certainly find an answer to your question.
But if you can't find it, don't be shy to send us an email to support@wizzymotion.com
or a message through the WizzyMotion Extension itself.

We are here to help you! Ever!
